

H'MIMI CHIOUKH

Product Designer

Tizi Ouzou, Algeria · Remote (UTC+1) · +213 777 436 820
hmimichioukh@gmail.com · <https://hmimi.design> · [linkedin.com/in/hmimi-chioukh](https://www.linkedin.com/in/hmimi-chioukh)

Product Designer with 5 years designing B2B software across fleet operations, club management, recruiting, and clinical workflows. Owns the full cycle — research, flows, information architecture, design systems, and developer handoff — and is currently the sole designer on a fleet operations platform. Designs AI-integrated products, and writes HTML, CSS, JavaScript, and React.

EXPERIENCE

Dadycar Apr 2023 – Present

Product Designer · Remote · Sole designer

- Own product design end to end with no design lead above the role, working directly with founders and engineering on a fleet operations and vehicle asset management platform.
- Designed core asset workflows: vehicle assignment, lifecycle tracking, and daily task management.
- Structured dense operational data into a scannable hierarchy without removing information operators depend on.
- Ran discovery through direct observation, with users performing real tasks rather than describing them. Findings drove a roadmap built with the lead developer and product owner; clients reported bulk fleet data updates falling from roughly one day per week to under two hours.
- Designed AI-integrated predictive maintenance views: confidence display, operator override, and fallback states when no prediction is available.

Shihany Jun 2022 – Jul 2025

Product Designer · Remote (concurrent)

- Designed a multi-tenant SaaS for sports clubs and academies serving three user roles with conflicting needs — player, coach, and administrator — in a single product.
- Built information architecture around each role's actual responsibilities and permissions rather than the underlying data model.
- Built and maintained a design system — component library, tokens, and documentation — adopted across multiple product initiatives.
- Led user interviews and usability testing with coaches and administrators; shipped biweekly in agile sprints with engineering and product for three years.

Sprint Sep 2022 – Oct 2023

Product Designer · Consulting (concurrent)

- Designed an AI-powered recruiter dashboard with candidate matching UX, including how match scores are explained, ranked, and challenged by the recruiter.
- Built the end-to-end candidate experience across application, scheduling, and status tracking.
- Scoped the engagement independently and researched recruiter and hiring-manager workflows.

SELECTED FREELANCE PROJECTS

Focus Care · Healthcare 2025

Designed pre- and post-operative consultation workflows and a modular form builder enabling clinical staff to create medical questionnaires without developer involvement.

Regolize · AI / Cybersecurity 2023

Designed a conversational interface for cybersecurity regulation queries: ambiguous questions, source citation, and cases where the system cannot answer with confidence.

WheelOfWork · Marketplace 2021 – 2022

Designed two-sided marketplace flows for contracts, secure payments, and project milestones, plus admin dashboards for verification and support.

SKILLS

Product design — End-to-End Product Design · User Flows · Information Architecture · Wireframing · Prototyping · Interaction Design · Responsive Design · Accessibility

Design systems — Design Systems · Component Libraries · Design Tokens · Figma Variables · Auto Layout · Documentation · Developer Handoff

Research — User Research · User Interviews · Contextual Observation · Usability Testing · Synthesis

B2B and complex data — Dashboard Design · Operational Tooling · Admin and Back-Office Interfaces · Multi-Role Permissions

AI product design — Conversational UI · Predictive Interfaces · Human-in-the-Loop Patterns · Scoring and Ranking UX

Technical and tools — HTML · CSS · JavaScript · React · Design-to-Code Handoff · Figma · FigJam · Notion · Jira · Slack · Agile / Scrum

Languages — English · French · Arabic · Tamazight

EDUCATION

BTS, Web Development and Multimedia Design — National Institute of Khalil Zyat, Blida, Algeria · Feb 2019 – Apr 2022
